About

Computer Science student with a background in software development for Apple platforms. Focused on creating software that enriches the lives of others.

Experience

Service Technician & TECH Specialist

London Drugs | Saskatoon, SK
October 2023 - August 2026

- Repaired Apple devices to factory standards of quality as an Apple Certified Repair Technician.
- Assisted customers with technical support and device purchases in a fast paced environment with professionalism and personalized care.

Skills

- Proficient in the Swift and Python Programming Languages.
- Fluent in the use of SwiftUI, SwiftData, App Intents, Device Hub, Xcode, and other tools and frameworks for software development across Apple platforms.
- Skilled with Sketch and SwiftUI for UI/UX design and interactive prototyping.

Awards, Achievements, and Projects

Schulich Leaders Scholarship (2026)

- Awarded Canada's most prestigious STEM scholarship for demonstrating exceptional leadership, academic excellence, and entrepreneurial talent.

Quotey (2026, active development)

- Developing a multi-platform app using SwiftUI, SwiftData, a custom CKSyncEngine layer, and App Intents, where users quote memorable moments with friends and family in shared collections.

Apple Web Server and Product Security Acknowledgements (2022 - Present)

- Credited with four Apple web server vulnerability disclosures and one bounty from research submitted through Apple Product Security.

Apple Swift Student Challenge Award (2022)

- Awarded for creating an exemplary app playground project in the Swift Programming Language which helped users to better understand the neurological phenomenon synesthesia.
- Chosen to represent Canada on a video call with former Apple CEO Tim Cook to showcase the winning app playground project.
